spoon children lounge

070903-1|2|3|4

Originally developed for the children's play area of Australia's largest regional art gallery, this practical seating solution has been designed with children as its primary focus. Its interlocking forms encourage interaction and can be rearranged to create a playful stepped seating landscape. Upholstered in vinyl for easy cleaning and everyday practicality, this exciting range features softly curved edges and is ideal for educational, recreational and community spaces that encourage children to freely engage in play and social activities.
