

Cero jr. stool

030605

Cero Jr. is the compact sibling to Brian Steendyk's award-winning Cero Chair. Retaining the sculptural DNA of the 2003 original, it has been thoughtfully reimagined to suit children's play and everyday use. Defined by a union of comfort and structural strength, *Cero Jr.*'s signature central void intelligently distributes forces throughout its circular frame, creating a level of durability that exceeds conventional four-legged seating. Designed for the next generation, its silhouette and ergonomic dimple seat encourage good posture while ensuring safety. Fabricated from UV-resistant, recyclable polyethylene, Cero Jr. is a versatile omnidirectional piece suited to educational, recreational and contemporary residential environments.
