wave hanger

030805-3_blk | 3_sst

The humble paper clip is one of those designs we take for granted because of its efficient and practical nature. Few have been able to improve upon its original design. Similarly, the utilitarian clothes hanger has undergone many variations in materials while its general form has remained largely unchanged until now.

The Wave Clothes Hanger is an ingenious new spin on the traditional clothes hanger, creating an asymmetric and dynamic functional form. Both the *Wave Clothes Hanger* and its packaging are 100% recyclable and can be beautifully complemented by the *Wave Clothes Rack*, making it ideally suited to elegant hotels, retail stores, office receptions and the contemporary home where style is important.
